

Name Index to Photograph Collection

What follows is a name index only to the Finnish American Historical Archives' Historic Photograph Collection (Old Topical File). See Archival Finding Aids for a complete listing of this collection.

When more than one surname was indicated concerning one photo, the entry with the first surname lists all of the individuals, while each additional surname is also listed individually.

The metadata concerning each photograph is limited to whatever information is available on the object, often revealing limitations to the information about each object (for example, a mounted card photo that simply states "Mrs. Maki," or an group photo that only includes surnames). Another limitation is the legibility and clarity of the handwriting.

This name index was created by Larissa Poyhonen in the summer of 2010, while performing preservation work on this collection. Megan Ott transcribed the Knights of Kaleva Convention Photograph in November, 2010. The index was edited and prepared for the Internet by Kent Randell.

This index also includes the [Knights of Kaleva Convention Photograph, August, 1910](#)

The index also includes the pictures included in the book *Tervehdys Suomelle*, published in Brooklyn, N.Y. in 1920.
